Ph No: +44 7826-363053 | E-mail: whltn8282@gmail.com | Manchester, UK | www.linkedin.com/in/dohyoungkim1011

Profile

I started my development career in Japan as a QA Engineer. In South Korea, I worked as a full-stack developer with strong front-end skills. At a start-up, I built many projects from A to Z. At first, I worked as a full-stack developer, and later I focused on project management and front-end work. I also have experience using Python, AWS, and Azure, and I have designed system structures for different projects. My biggest strength is front-end development, especially data visualisation, and I am comfortable creating charts and interactive visuals.

Experience

Turingbio

Full Stack Engineer with Corporate Insight

Seoul | South Korea

Apr 2021 - July 2025

- Frontend Lead responsible for scalable React/Next.js applications built with TypeScript.
- Managed and optimised AWS/Azure cloud infrastructure.
- Maintained and modernised legacy JavaScript/Node.js/Python systems with Docker-based deployments.
- Developed Python-based serverless backend functions for automated data processing and analytics workflows, contributing to a depression prediction model that received a patent in South Korea.
- Leveraged LLM-based tools (ChatGPT, Claude, GitHub Copilot) to generate and validate test cases, improving development speed and code reliability.
- Integrated AI-assisted workflows into development processes to automate repetitive engineering tasks and improve productivity.
- Built a back office dashboard using “vibe coding” approaches, reframing complex clinical workflows into a delivery-tracking style UI, improving clarity, usability, and communication across stakeholders.

GCS

QA Engineer

Tokyo | Japan

Aug 2019 - Oct 2020

- Conducted backend performance and load testing using JMeter.
- Monitored and analysed system performance using AWS CloudWatch, EC2, and PostgreSQL.
- Worked closely with backend engineers to identify bottlenecks and improve system reliability.

Education

Konyang University

Bachelor of Science in Medical IT Engineering | South Korea | Feb 2013 - Feb 2019

Britannia English Academy

Conversation Intermediate Level (B1+ level) | United Kingdom | Sep 2025 - Nov 2025

Skills

- **Core Stack** : TypeScript, JavaScript, React, Next.js
- **Backend & APIs** : Node.js, REST APIs, Python, Php
- **Databases** : SQL (MySQL, PostgreSQL), MongoDB, Firebase
- **Cloud & DevOps** : AWS, Azure, GitHub Actions, Vercel, Firebase, Docker
- **Engineering Focus** : Performance Optimisation, Scalable Architecture
- **Automation & AI Tools** : ChatGPT, GitHub Copilot, Codex, Claude, LLM-assisted development
